| 2 .Model

This guide refers to Talkpod N5XA 4G Android 9.0 series

| 3 .Tools

- 1. APP: the apk file of the APP that you use.
(We will use Talkpod.apk as an example in this guide.)
- 2. PC: with Win7 or Win10 system.
- 3. Program cable: for Talkpod Android radios.
make sure you are using TPC03 cable (3feets)

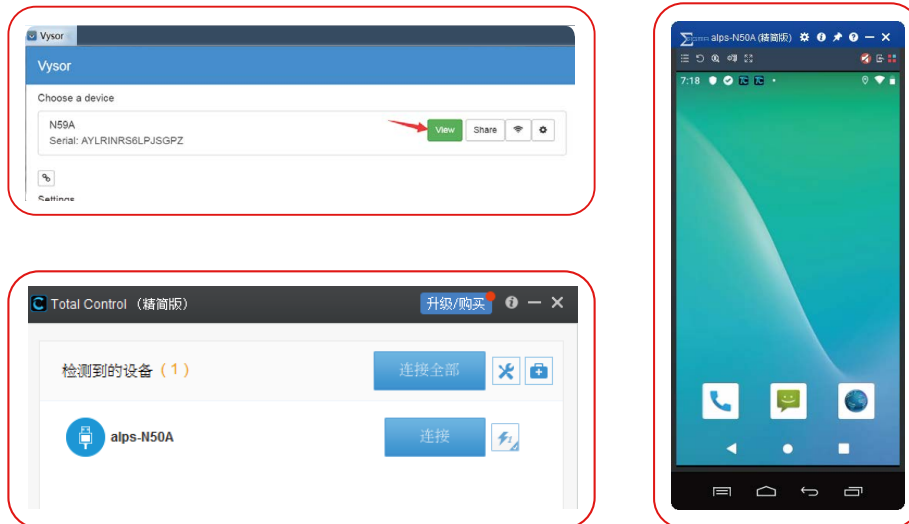

- 4. Interface Software: for connecting with none screen radios, to see the interface of the radio, you can install the APP to the radio by using this software. and to program the account, password, etc.
There are other software like this too, for example Vysor and Total control.
Download Vysor from <http://www.vysor.io/>
Download Total Control from <http://tc.sigma-rt.com.cn/>
- 5. Talkpod Interface APP: This is an app that we can install in our mobile phone and use it to creat a hotpot and connect to the none screen Android radio, then this APP will show the interface of the none screen radio, in this way you can program the radio or set wifi.
(under developing, coming soon)

I 4 .Connecting

- 1. Connect the cable to the PC with the cable, and the radio will install the driver automatically.
(If not, please install driver manually.)

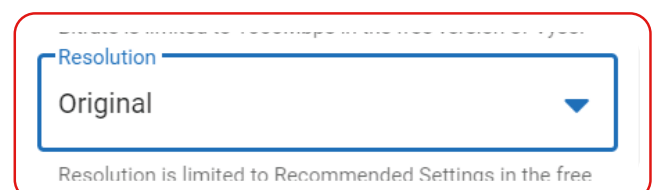

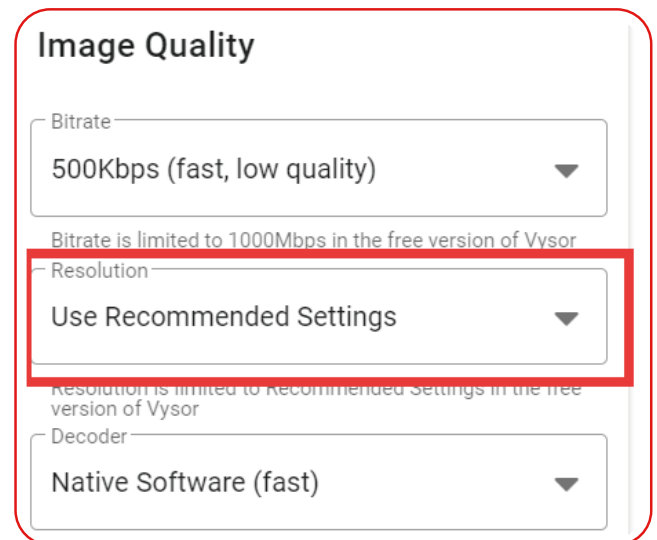

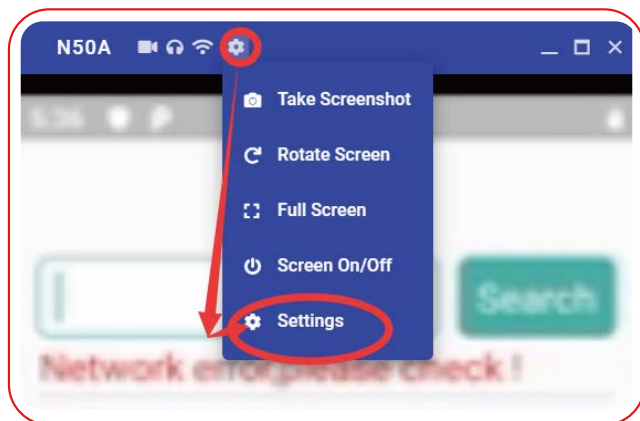

- 2. Open Vysor or Total control and connect, it will show the interface of the radio

- 3.If the screen is blur with Vysor.

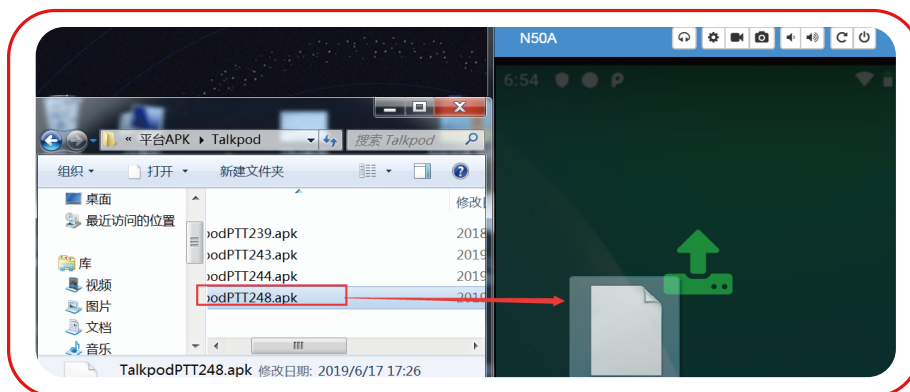

Check settings from

Change Image Quality Resolution to Original

I 5 .Install APK

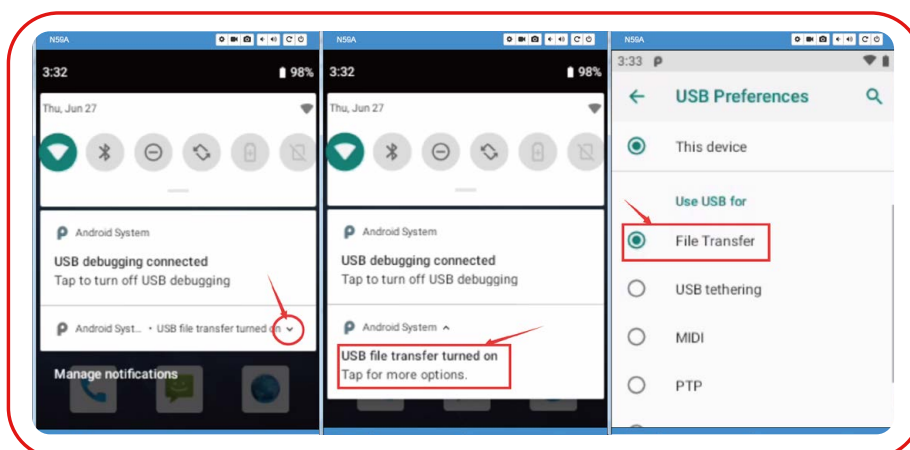

- 1. Move the apk file to the interface to install (Vysor require Pro version.)

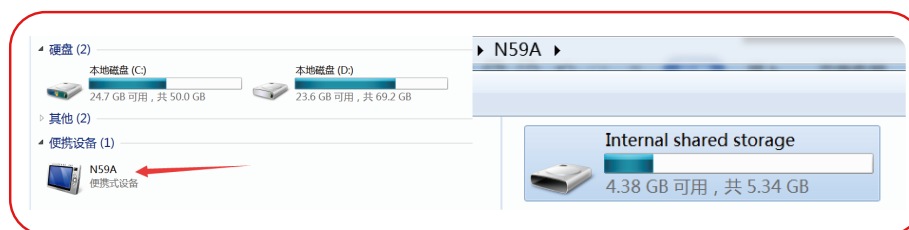

If you don't have a Pro version, use Total control.

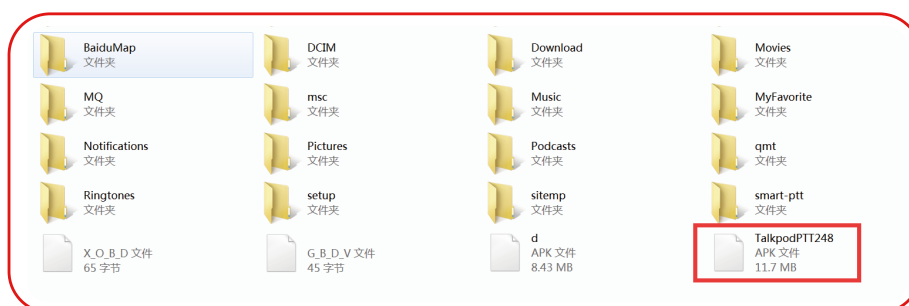

- 2. Transfer the apk file to the radio.
 - a. Slid down the notification and show below
 - b. Change it to be USB file transfer

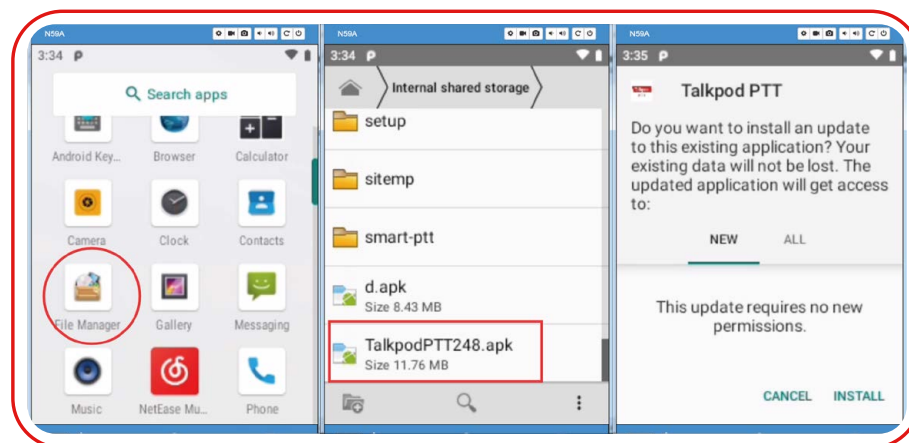

c. Check “My Computer” and find the radio’s drive

d. Move the apk file to this drive.

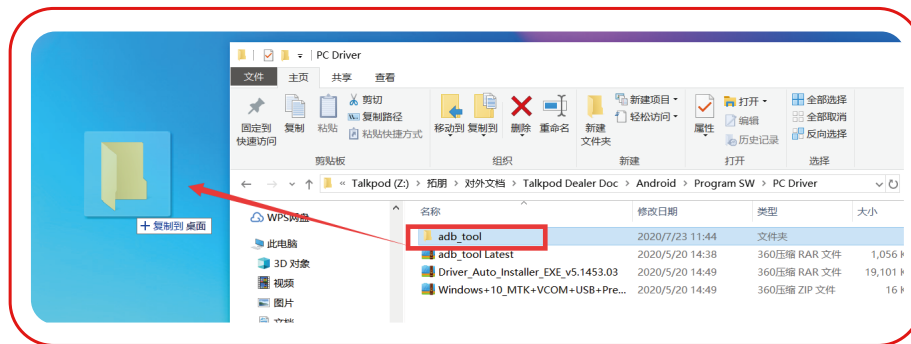

e. Find the apk file from File Manager and install

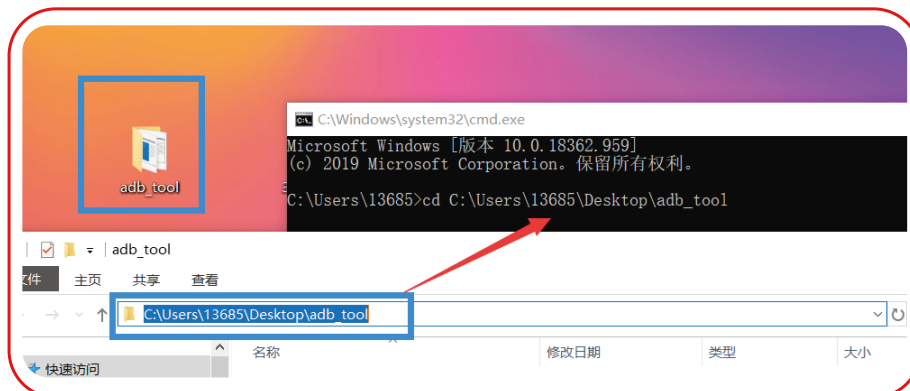

● 3. 3.Use Command to install APK.

- power on the radio and connect to computer.
- Move the ADB driver file to PC desktop.

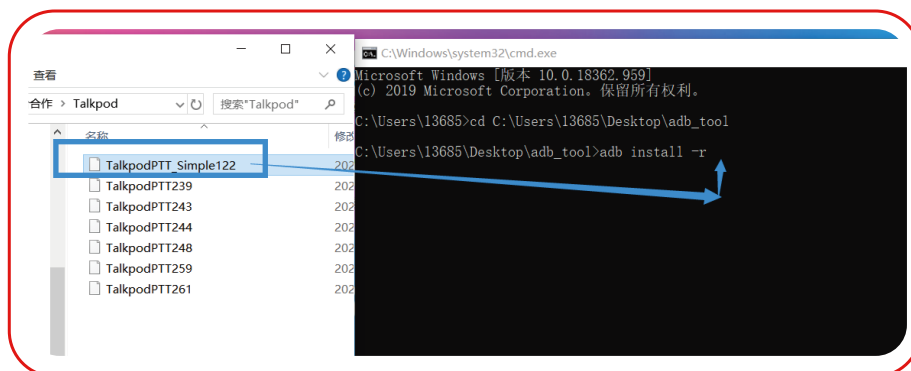

c. Open Command. (you can click the Windows  + R  to open command) or search CMD

- 1) Input cd
- 2) And then copy the address of the ADB file to it and then click Enter

- 3) input adb install -r (there is a space after r)
- 4) And then drag the apk file to it and click Enter

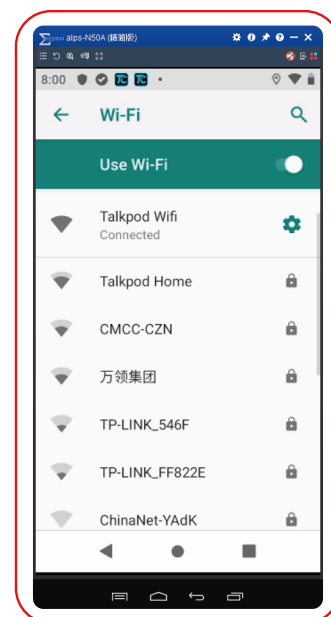

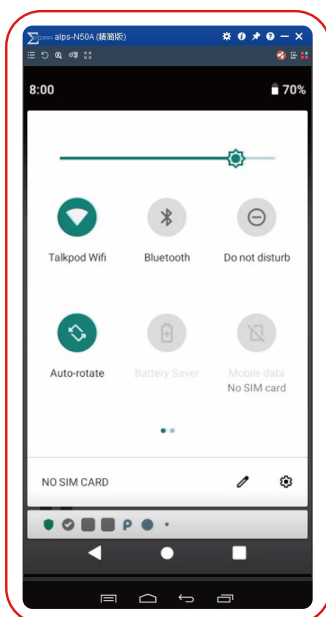

5) Success to install

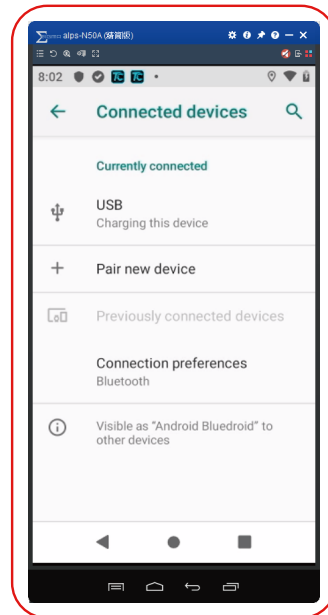

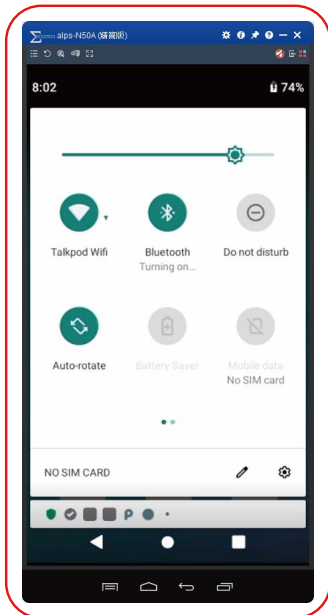

```
C:\Users\13685>cd C:\Users\13685\Desktop\adb_tool  
C:\Users\13685\Desktop\adb_tool>adb install -r Z:\拓朋\产品资料\平台合作\Talkpod\TalkpodPTT_Simple122.apk  
3515 KB/s (5998008 bytes in 1.665s)  
Success  
C:\Users\13685\Desktop\adb_tool>
```

6) if you need to install app for many times. Just click the UP ↑ (it will show the previous command)and then click enter.

I 6 .Connect Wifi

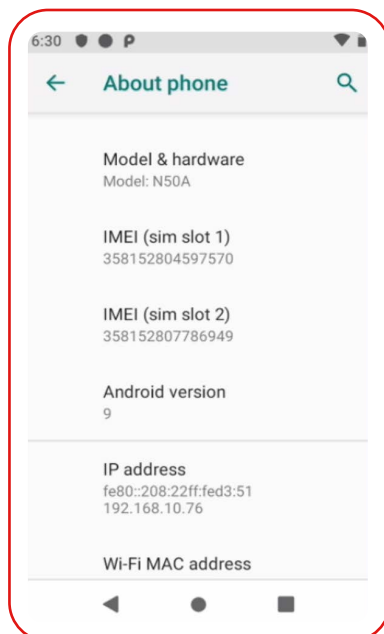

I 7 .Bluetooth

8 .IMEI

Settings-Advanced-About Phone

I 9 .SIM Card Slots and IMEIs

SIM1 use IMEI1

SIM2 use IMEI2

The graphic features a central blue sphere with the word "Talkpod" in white text inside a white-bordered blue rectangle. This central element is surrounded by several smaller blue spheres of varying sizes, some of which are connected by thin white lines, suggesting a network or molecular structure. The entire composition is set against a dark blue background with a subtle grid pattern. Two vertical white lines extend from the top corners of the page, each ending in a circular node that contains a smaller blue sphere, mirroring the central theme.
